EZ20

ESSENTIAL ZINC

Granular Zinc 20%

**Agrium
Advanced
Technologies
(AAT)
introduces
"EZ20",
a highly water
soluble
granular zinc
nutrient.**

**Does water
solubility
really matter?**

**It sure does!
"Crops don't
eat their
nutrients, they
drink them!"**

Benefits of EZ20

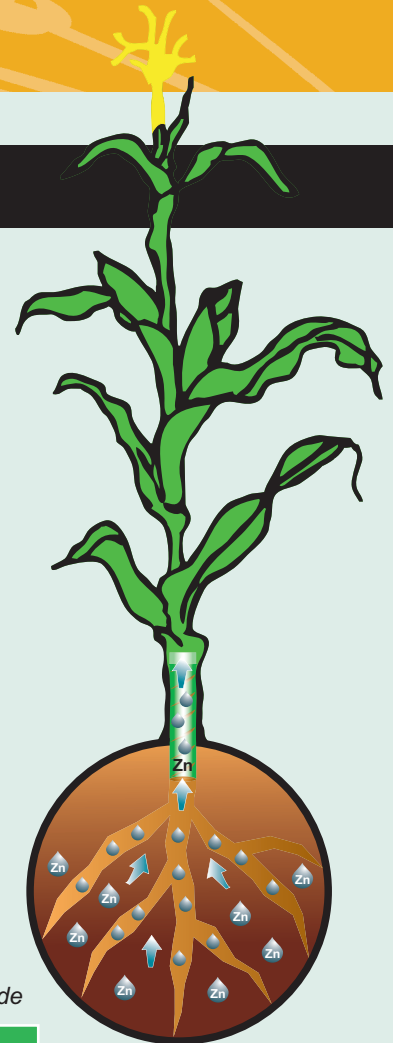

- ✓ Highly water soluble at 70% plus! Recent Colorado State University and several other university studies, have set the minimum water solubility target between 40% and 50%. **EZ20 exceeds** the university minimums by over 35%.
- ✓ The small percentage of water insoluble zinc in **EZ20**, is in a micronized zinc hydroxide form.
- ✓ High percentage of crop essential sulfur at 14%! All the sulfur in **EZ20** is in the immediately available form of sulfate sulfur.
- ✓ **EZ20** offers you the highest ratio of sulfur to zinc available.
- ✓ Nitrogen content of 2%, provides added dollar value to **EZ20**! And it's in the ammonium form, which means it won't volatilize.

Guaranteed Analysis

Nitrogen	2.0%
Sulfur	14.0%
Zinc	20.0%
Water Solubility	>70.0%
SGN	250
Uniformity Index	50%
Color	Grey/Dark Grey

Nitrogen from ammonium nitrogen, sulfur from ammonium sulfate and sulfuric acid (which will all be in the sulfate form) and zinc from zinc sulfate and zinc hydroxide.

EZ20

ESSENTIAL ZINC

Granular Zinc 20%

...benefits cont'd

- ✓ **EZ20** has 2% totally water soluble Iron.
- ✓ **EZ20's** low analysis, offers maximum distribution of granules per acre. Since root interception and diffusion (very little nutrient movement) are the primary uptake mechanisms of zinc, increased feeding sites (nutrient rich zones) are critical for maximum benefit.
- ✓ **EZ20** delivers almost twice as many granules per acre as does a 35.5% zinc product! Basis 5# of actual zinc per acre, **EZ20** delivers over 520,000 granules per acre vs. less than 300,000 from a 35.5% zinc source. That's almost 50% more feeding sites per acre.
- ✓ **EZ20** makes the recommendation easy! Want 1# of zinc, just add 5#'s of **EZ20**, want 5#'s of zinc, just add 25#'s of **EZ20**.
- ✓ **EZ20** is made from an extremely clean zinc hydroxide to ensure environmental friendliness.

Comparison

Product	Analysis	Product rate per acre	Actual Nutrient per Acre			Granules per acre
			Nitrogen	Sulfur	Zinc	
EZ20	20.0% Zinc	25#/acre	.50#	3.5#	5#	>500K
Others	35.5% Zinc	14#/acre	0.0#	2.4#	5#	<300K
